

asg.renaissance

From a shortlist of five partners and multiple software solutions, we selected Custom Computer Resources because they demonstrated expertise in understanding key business problems that we wanted the new system to solve.

Since CCR has assisted us in implementing the Solomon solution in a timely and efficient manner, we've been able to achieve success in the following business areas:

- No more overruns on our customer PO balances, minimizing bad debt and write offs
- Ability to control costs on projects before it is too late. Pro-active project management has allowed us to improve project profitability
- Accuracy and efficiency of time collection and billable expense detail has helped us to shorten our billing cycle and improved our cash flow
- Accuracy of our customer invoices and the ability to tailor the presentation to meet customer requirements has increased Project Manager's confidence in the system

Solomon systems built-in capabilities in Project Controller and Time and Expense applications have increased our project management efficiency. Solomon system enables us to provide all Project stakeholders and company shareholders mission-critical data in a quick, accurate and confidential manner.

From the point of initial contact through the process of implementation, CCR has worked with us in a way that exhibits the level of professionalism and expertise we look for when choosing to partner with a company. Their up-front and ethical approach set them apart from other companies by displaying their desire to find the best fit for ASG Renaissance.

Based on the outstanding quality, reliability, and expertise of CCR's staff and the versatility of Solomon as a total solution, we would highly recommend partnering with CCR.

Sincerely,

Aaron Tate  
Controller
